

JANE NJERI NJUGUNA

Data Analyst | Data Scientist

Nairobi, Kenya | +254 740 903 846 | janenjuguna550@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming & Databases: Python, SQL, PostgreSQL, SQL Server

Analytics & BI: Power BI, Excel, Tableau, Looker Studio, EDA, Statistical Analysis, KPI Development, Dashboard Design

Machine Learning & AI: Scikit-learn, LightGBM, XGBoost, TensorFlow, PyTorch, NLP, LLM Applications

Geospatial AI: Sentinel-2, Remote Sensing, Raster Processing, Geospatial Machine Learning

Data Engineering: ETL/ELT, Data Pipelines, Data Transformation, Data Validation, Docker, dbt, AWS S3, Data Warehousing

Tools: Git, GitHub, Streamlit, Jupyter, VS Code

PROFESSIONAL EXPERIENCE

Data Analyst | GOChapaa

Jan 2024 – Jan 2026

- Analyzed business and operational data within a digital finance and cryptocurrency environment to identify trends, patterns and performance insights.
- Prepared, cleaned and organized datasets to support analysis, reporting and business decision-making.
- Developed analytical reports that translated complex data into clear and actionable insights for business stakeholders.
- Monitored business and performance trends to support operational planning and informed decision-making.
- Communicated data-driven findings to help stakeholders understand performance, identify emerging trends and support business priorities.

Data Analyst Intern | Kurasa Africa - part time

Jun 2025 – Sep 2025

- Developed SQL reporting workflows and analytical solutions using PostgreSQL to support educational performance monitoring and operational decision-making.
- Designed and maintained interactive dashboards in Power BI for student engagement, examination outcomes and institutional reporting.
- Cleaned, transformed and validated academic datasets to improve reporting accuracy and data reliability.
- Conducted exploratory data analysis to identify learning trends, performance gaps and operational insights.
- Automated reporting processes and dashboard updates, reducing manual reporting effort and improving access to insights.
- Contributed to dashboards and reporting solutions supporting educational analytics, KPI monitoring and institutional decision-making.

Data Analyst Intern | Kiondo Market

Jul 2023 – Dec 2023

- Analyzed sales, inventory and operational datasets across 500+ products using SQL, Excel, and Power BI.
- Developed KPI dashboards and business intelligence reports supporting revenue monitoring, inventory planning and operational decision-making.
- Conducted customer segmentation, trend analysis and profitability assessments to identify business drivers and growth opportunities.
- Automated recurring reporting workflows and strengthened data validation processes.
- Delivered analytical recommendations supporting pricing strategies, inventory planning, and performance improvement initiatives.

- Provided insights that improved visibility into sales performance, product demand, and operational efficiency.

ACHIEVEMENTS

- 2nd Place -Top Female, Côte d'Ivoire Crop Classification Challenge
- 7th Place / 99 Participants, Climate Health Risk Prediction Challenge
- 30+ Dashboards Delivered across analytics and business intelligence work
- 10+ Data & Analytics Projects Completed

KEY PROJECTS

Climate Health Risk Prediction | [GitHub](#)

- Developed a machine learning model to predict health risk levels using climate and environmental datasets.
- Performed data cleaning, exploratory data analysis and feature engineering to improve model performance and data quality.
- Trained and evaluated classification models using cross-validation and performance metrics to ensure robust predictions.
- Identified key environmental factors associated with health risk outcomes through statistical and predictive analysis.
- Generated interpretable insights to support early risk detection and evidence-based public health decision-making.

Sentinel-2 Multi-Temporal Crop Classification | [Github](#)

Award: 2nd Place - Top Female

- Developed a pixel-level machine learning model to classify cocoa, rubber and oil palm plantations using multi-temporal Sentinel-2 satellite imagery.
- Processed geospatial raster datasets and engineered spectral, vegetation, spatial and temporal features to improve crop classification performance.
- Built a LightGBM-based classification pipeline with Optuna hyperparameter optimization and GroupKFold cross-validation to prevent spatial leakage.
- Conducted extensive experimentation and model tuning to improve generalization across geographically distinct regions.
- Achieved a cross-validation Macro F1 score of 0.8663, demonstrating strong predictive performance across all crop classes.
- Ranked among the top participants in an international machine learning competition focused on precision agriculture and remote sensing.

EDUCATION

Diploma in Data Science & Analytics - Distinction (GPA: 3.72)

Zetech University

Jan 2024 – Nov 2025

Nanodegree in Data Science

Moringa School

Jul 2022 – Feb 2023

BSc. Community Health and Development

Catholic University of Eastern Africa

Nov 2020 – Apr 2022
